

The Institute for Biochemistry at the University of Münster offers positions in the group of Prof. K.-H. Klempnauer for two

Post-doctoral scientists (m/f)

The positions are available for two years and will be filled as soon as possible. The group studies the function of transcription factors of the Myb family in biological processes and their roles in tumor development. The successful applicants will be involved in projects studying the role of B-Myb in cell cycle regulation and the characterization of small molecule inhibitors of c-Myb. Applicants should have a doctoral degree in biochemistry or biology, be highly motivated and have experience in molecular biology, biochemistry and cell biology. For further information please see our website: <http://www.uni-muenster.de/Chemie.bc> or contact K.-H. Klempnauer (klempna@uni-muenster.de). Please send your application together with CV and contact details of 2 references to Prof. K.-H. Klempnauer, Institut für Biochemie, Universität Münster, Wilhelm Klemm Str. 2, 48149 Münster, or by e-mail to: klempna@uni-muenster.de
